WORK EXPERIENCE

Milacron   **Jan 2019 - Sept 2019**
IT Support Specialist
- Led a project to migrate 200+ users from Windows 7/Exchange to Windows 10/O365 over 4 months
- Designed scripts to reduce the turnaround time for new hardware making the process twice as efficient
- Wrote SQL queries to pull data on IT ticket completion and efficiency and used those results to generate Cognos/BI reports to present to the IT Director and CIO
- Responsible for training new IT Interns in providing tier 1 support and teaching them the about the company's network infrastructure

Milacron   **May 2017 - Sept 2018**
IT Intern
- Designed and deployed scripts to automate solutions to common issues that users faced
- Created and implemented a streamlined process to provide cellphone upgrades to 200+ users company-wide
- Wrote detailed documentation on difficult issues to help future interns solve tickets more quickly
- Provided Tier 1 and Tier 2 support for upwards of 200 active tickets for users located in Canada, USA, Europe, China and India

PROJECTS

Personal Website   **August 2020**
- Frontend was done using HTML/CSS and the backend was done in JavaScript while using the React framework
- Implemented "react-router" for dynamic routing between webpages and "react-mdl" for a clean UI
- Created a responsive UI so that the website scales properly on mobile web browsers

Facetag   **Mar 2016**
- Collaborated with 3 teammates to create a facial recognition app for Android using the Kairos API that links faces to social media accounts of the users
- Split into teams of 2 and used paired programming to switch between working on the frontend (Android Studio) and the backend (Java)
- Winner of the "Most Promising Future Startup" award at NHacks 16'
